My name is Mrudula Eluri.

The topic I selected for the app is point estimate, one of the statistics topics.

It is a point estimate calculator.

You can change the mean, standard deviation, and sample size. It will create a density plot accordingly. When you hit the calculate button it will give the point estimate of the given values.

This app has an interactive plot and 3 GUI components.

Link to the app: https://mrudulaeluri.shinyapps.io/pointestimate/
